Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species I: Figure 2.

Species II: Figure 6A-6B.

Species III: Figure 12.

Species IV: Figure 13.

Species V: Figure 18.

Species VI: Figures 21.

Species VII: Figures 29.

The species are independent or distinct because of the reasons:

1/ Figures 2, 6A-6B, 12, 13, 18, each figure discloses an imaging device, which has only one horizontal CCD.

2/ Figure 2 discloses a pattern of color filters, in which color filters in color "G" are disposed on the photosensors 31 in even number arrays. This feature is not disclosed in each of Figures 6B, 12, 13, 18, 29.

3/ Figure 2 discloses the transfer gates 32 in the even number arrays are disposed at lower parts on a right side of the photosensors 31, the transfer gates 32 in the odd number arrays are disposed at upper parts on a right side of the photosensors 31. This feature is not disclosed in Figure 12 or Figure 18.

Art Unit: 2622

4/ Figure 6B discloses photosensors 51 are arranged in a skewed matrix pattern on surface of imaging device 50. This feature is not disclosed in each of Figures 2, 12, 18.

5/ Figure 6B discloses transfer gates 52 are provided between the photosensors 51 and the vertical CCDs 53, the transfer gates 52 in the even number array are disposed at upper parts on a right side of the photosensors 51, the transfer gates 52 in the odd number array are disposed at upper parts on a left side of the photosensors 51. This feature is not disclosed in Figure 13.

6/ Figure 13 discloses that the adding-up and readout are performed in a unit block 79, which is not disclosed in Figure 6.

7/ Figures 21, 29, each figure discloses an imaging device, which has two horizontal CCDs.

8/ Figure 21 discloses a pattern of color filters, in which color filters in color "a" are disposed on the photosensors 331 in even number arrays. This feature is not disclosed in Figure 29.

9/ Figure 29 discloses photosensors 351 are arranged in a diagonal grid pattern on surface of image sensor 350. This feature is not disclosed in Figure 21.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

If Applicant elects one of Species I (Figure 2), Species III (Figure 12), Species V (Figure 18) for prosecution, Applicant is required to elect further Figure 15 or Figure 16 or Figure 17 for prosecuting together with elected species.

Art Unit: 2622

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
